Description

Martin Lishman Protimeter Balemaster

The Protimeter Balemaster is the ideal tool to help decide if bales are in a safe condition to store or for assessment at power station intake points.

A 2-piece instrument and probe that really stands up to heavy farm and industrial use. Pressure can be used to force the probe into tough bales, without risk to the instrument.

The Balemaster uses a heavy duty 600mm moisture probe that measures the moisture content within the heart of the bale and determines if your straw is in a safe condition to store.

<https://youtu.be/oW8-O45hzuc>

Supplied in a soft carry case with a wrist strap.

Martin Lishman also provide a full 12 month warranty and a complete after-sales service and calibration back-up capability.

Optional temperature probe available separately. Please contact **Ernest Doe & Sons Ltd** for any assistance you may require when purchasing this product.
