Description

RLA 240 CORDLESS LAWN SCARIFIER: AK SYSTEM CORDLESS SCARIFIER WITH BOTH SCARIFYING BLADE & SPRING TINE ROLLER ATTACHMENTS

The STIHL RLA 240 cordless lawn scarifier is the ideal choice for scarifying or dethatch smaller, more irregular lawns. Part of the STIHL AK System, this scarifier is powered by a 36v lithium-ion battery which makes it possible to maintain your lawn cordlessly and enjoy full freedom of movement when guiding the scarifier – without any worry of cables getting in your way or emissions.

Thanks to its working width of 34 cm, the scarifier combines high manoeuvrability with efficiency – especially on lawns with lots of corners. It also gives you the option of either scraping the turf using the scarifying blades unit for better aeration or combing the dead grass and moss out of your lawn using the spring tine roller. Simply attach the tool you need in a few simple steps, adjust the working depth using the infinitely adjustable scale and start aerating or combing your lawn. Any accumulating plant remains are collected in the 50-litre grass catcher box.

The STIHL RLA 240 is energy efficient and highly stable thanks to its lightweight and robust polymer housing. The easy-running wheels make it very manoeuvrable, the foldable handlebar and two integrated carrying handles simplify transport and a spring mechanism makes removing the lithium-ion battery easy for charging or storing.

The height of the attachments can be adjusted from 7.5 mm above ground to 9.5 mm below the ground surface.

Working area covered with recommended AK 20 battery is 250 m².

- Set includes 2 x AK 20 batteries and standard AL 101 charger
- Compact cordless lawn aerator for smaller, angled lawns
- Suitable for scarifying and dethatching lawns
- Infinitely variable desired working depth
- Easy-to-manoeuvre thanks to smooth-running wheels
- Easy transport and compact storage
