Description

HTA 66 Cordless Pole Pruner: Very lightweight cordless pole pruner, with a 25 cm / 10" bar length

STIHL Cordless Pole Pruner – Lightweight, Quiet & Powerful

This high-performance cordless pole pruner is designed for garden, orchard, and grounds maintenance. It features a **lightweight power head** for easy manoeuvrability and balance, delivering precise, low-vibration cutting with the **1/4" PM3 saw chain**.

Key features:

- **Lightweight and quiet**, ideal for extended use
- **Fixed 240 cm shaft** for stable cutting (non-extendable)
- **Side-mounted chain tensioning** for easy adjustments
- **Captive sprocket cover nut** for hassle-free maintenance
- **Effortless Branch Removal**
The sturdy branch hook allows for easy removal of loose and cut branches when working at height, ensuring a clear and tidy work area.
- **Low Maintenance and Highly Efficient**
The compact and lightweight EC motor is designed for maximum efficiency, allowing for energy-saving operation. It also offers a long service life with minimal maintenance required.
- **Effortless Starting**
Starting the tool is simple – release the lock using the locking switch, then activate it with the trigger. The additional ERGO lever allows for continuous operation without needing to restart. A self-resetting locking switch prevents accidental activation, and the design is suitable for both left- and right-handed users.
- **Reduced Fatigue for Comfortable Use**
The optimally balanced battery reduces tilting torque, ensuring greater stability and comfort during use. This design helps minimise strain, allowing for extended operation with less fatigue.

Battery performance: Up to **42 minutes** with the recommended **AP 200 battery** (sold separately).

Please note: The exterior design of STIHL guide bars may vary, but technical specifications remain unchanged.

We are an authorised **Stihl** dealer and can provide full service back up and maintenance for your Stihl equipment.
