Description

HTA 86 Cordless Telescopic Pole Pruner

When it comes to tree care, the HTA 86 gets straight to the point. This powerful, cordless pole pruner is built for professional use in tree maintenance, orchards, and by local authorities. It's designed to handle everything from pruning trees and cutting back fruit trees to removing dead wood and clearing storm damage.

Key features include a 30 cm (12") bar length, a robust ¼" PM3 saw chain, and a lightweight, compact power head complete with a sturdy branch hook for easily clearing loose cuttings. The rigid shaft offers reliable guidance for a clean, precise cut every time, while the quick-release mechanism lets you adjust the length rapidly—from 270 to 390 cm—to suit your needs.

Note that while the exterior design of STIHL guide bars may change, the technical specifications remain solid and dependable. This pruner combines modern innovation with the proven methods of the past, offering a tool that's as forward-thinking as it is traditionally reliable.

We are an authorised **Stihl** dealer and can provide full service back up and maintenance for your Stihl equipment.
