## Honda Miimo 70 Live Robotic Lawn Mower – For Lawns up to 700m<sup>2</sup>

### Effortless, Intelligent Lawn Care – Tailored to Your Garden

The Honda Miimo 70 Live is a smart robotic mower designed to take the hassle out of lawn maintenance. Perfect for gardens up to 700m<sup>2</sup>, including those with narrow passages as small as 75cm (wire to wire), it delivers precise, consistent results with minimal input.

Powered by Map & Mow technology, Miimo accurately maps your lawn's layout, calculates the area, and creates a bespoke mowing schedule. It even adapts to real-time conditions using Smart Timer technology – avoiding mowing in heavy rain or dry spells when the grass hasn't grown, for optimal efficiency and healthier grass.

You stay in control with the Mii-Monitor app, intuitive onboard display, and Alexa voice compatibility – giving you full access and control from anywhere, at any time.

With its logical cutting pattern, Miimo ensures a smooth, even finish across your entire lawn, time after time.

### Key Features

#### Advanced Intelligence for Effortless Mowing

More than just smart, Miimo is truly intelligent. A powerful microchip processes real-time data from sensors, feeds and software, enabling accurate decisions on mowing schedules, navigation and adapting to changing conditions.

#### Precise & Reliable Navigation

Miimo handles narrow passages and slopes up to 27% with ease. Boundary wires guide it safely, preventing damage to flowerbeds or accidental dips into ponds.

#### Smart Garden Mapping with Map & Mow

Simply activate Miimo and it maps out your garden, calculating shape and size to create a tailored mowing plan. With logical, systematic cutting, it's the smartest way to care for smaller gardens.

#### Targeted Mowing with Place & Mow

Need to mow under garden furniture or awkward corners? Just define the area manually—Miimo will take care of the rest with precision.

#### Weather-Adaptive Smart Timers

Using Smart Timer technology, Miimo monitors real-time weather, avoiding mowing during heavy rain or dry spells when the grass hasn't grown. The result? Consistent, healthy cuts, season after season.

#### Micro-Mulching for Greener Lawns

Miimo finely shreds clippings into micro-mulch, which returns nutrients to your lawn and eliminates the need to collect or dispose of grass cuttings.

#### Connected Control via App, Display & Alexa

Stay in control with the Mii-Monitor app, onboard display or Amazon Alexa. Adjust settings, update schedules or start mowing with a tap or voice command—from anywhere.

#### Durable, Weatherproof Design

Built to withstand the elements, Miimo is rated IPX4 weatherproof and will pause automatically during exceptionally heavy rain to protect both itself and your lawn.

#### Quiet & Discreet Operation

Working quietly in the background, Miimo preserves your garden's tranquillity while keeping it immaculate.

#### Comprehensive 360° Safety Sensors

Equipped with obstacle detection, lift sensors and high-traction wheels, Miimo avoids hazards, stops blades when picked up, and gets back to work without getting stuck.

#### Automatic Recharging

When the battery is low, Miimo automatically returns to its charging station and resumes mowing once recharged—completely hands-free.

#### Built-in Theft Protection

Miimo features a secure PIN code and a built-in alarm system that activates if lifted, ensuring it only operates for its rightful owner.

#### Neat & Systematic Cutting Pattern
