Honda 425LE Petrol Strimmer

HD-BCUMK425LE

Description

Honda 425LE Petrol Strimmer

The **Honda 425LE Petrol Strimmer** is driven by a unique six-splined drive shaft (as opposed to a traditional groove key design) for added strength, with better torque and power delivery down to the work zone. The **Honda 425LE** enables you to go boldly go where no other strimmer (brushcutter) can, with this extremely tough and reliable 4-stroke garden tool.

Brushcutters feature a special type of non-contact bearing, the same as those used by NASA, these bearings are renowned for their resistance to dust contamination, and are the best for ultra high-speed work. These bearings run freely with little resistance and are extremely quiet. They last much longer than the traditional full-contact rubber seal type – which can easily become contaminated with dust, overheat and wear out sooner than you think.

We are an authorised **Honda Dealer** and can provide full service back up for your equipment. Check out other products in the range:

Honda 435LE Strimmer **Honda 536VK Walk behind mower** **Honda chainsaw**

Contact us

Ernest Doe is a long established family firm with a network of branches in the South and East of England. Managing Director Colin Doe is the fourth generation of the family to have run the business in its 100+ years of trading.

The firm supplies an incredible amount of machinery; from garden mowers and chain saws to combine harvesters and construction excavators. Our philosophy is simple to supply the best products and then to support them with the service facilities and expertise to keep them running perfectly.
