Description

Luda Magnetic MachineCam Mobility Camera

MachineCam is a professional machine camera system designed to make your work easier, safer and optimising time spent in the field.

Designed with the Farming community in mind, a truly wireless camera system with a unique combination of battery and strong magnets allowing quick and easy transfer between different machinery.

Compact for all machines giving the driver a better more ergonomic overview, use when harvesting, baling or reversing with installation or changeover time taking less than 1 minute.

Working out of one box using wireless technology, the system transmits clear, high-quality video without interference.

Equipped with night-vision, MachineCam is made for long work-days on the farm and the powerful battery charge can keep the system running for up to 18-20 hours on a single charge depending on the light condition and temperature. Fully rechargeable straight from the hard case.

Kit contains:- 1x MachineCam Mini Camera, 1x Monitor, 2x Antennas, 1x Windscreen suction bracket for monitor, 1x Cigarette socket adapter for monitor (12 V), 1x Powerbank rechargeable battery, 1x Power adapter for PowerBank.

Ernest Doe is a long established family firm with a network of branches in the South and East of England. Managing Director Colin Doe is the fourth generation of the family to have run the business in its 100+ years of trading.

The firm supplies an incredible amount of machinery; from garden mowers and chain saws to combine harvesters and construction excavators. Our philosophy is simple to supply the best products and then to support them with the service facilities and expertise to keep them running perfectly.
