Description

Bosch UniversalAquatak 135 High-Pressure Washer

The compact and efficient Bosch UniversalAquatak 135 is designed to help you manage all your cleaning tasks quickly and effortlessly. The innovative 3-in-1 nozzle with pencil jet ensures a 10 percent improvement in cleaning performance when compared with older models.

The 1900w motor produces an impressive 135 bars for effective cleaning of cars, patios, decking and more. You'll find that the new Bosch UniversalAquatak 135 can cope with even the most stubborn dirt.

For fast application of detergent when cleaning, choose the high-pressure detergent nozzle which will enable you to distribute a fine layer of cleaning foam rapidly over the surface of whatever you happen to be cleaning at the time. All the accessories, the hose and the cables can be stored directly on the high-pressure washer to ensure simple storage. This makes it far easier to find the correct accessory when you need it, as they'll all be kept together.

For ease of movement, the washer comes with an extendable handlebar which can be folded down when not in use. All the accessories are push to fit, meaning that there's no fiddling around with complicated connections. Your new pressure washer is ready to use straight from the box; it just needs to be connected to power and water supplies.

Bosch products come complete with a generous two-year warranty, which is extended to three-years if you register your new product with MyBosch within 28 days of purchase.
