Description

Multi-Sharp Shear & Scissor Sharpening Tool

A good pair of sharp gardening shears is an essential tool for any avid gardener, however, if your shears are blunt then pruning, edging and shaping can become a frustrating experience due to the lengthy process and more than often with poor results.

Suitable for stainless steel, long-handled, wavy-edge, and single cutting-edge shears, this wonderful little tool offers an easy process to keep them sharp and in the best condition for years to come.

The sharpening blocks simply screws on to a bench, or the back of a shed door (screws included) and as the blades are pushed through, the Tungsten Carbide regrinds them to a sharp new edge and correct cutting angle.

Perfect too for sharpening Household, Craft & Garden scissors.

Recommended in the well-known book 'The Garden Expert' by Dr Hessayon.
