Description

Wolf Garten RR4000 Large Bypass Secateurs

These Bypass Secateurs are ideal for delicate, precise pruning and best used on younger growth.

Working in a scissor-like cutting action with one blade 'bypassing' the other, they provide a very clean cut, essential for maintaining a healthy plant or shrub.

The non-stick blades can cut through stems up to 22mm thick and have an internal spring mechanism and a central locking mechanism for ease of use.

Ideal for a larger sized hand and regular use, the handles have been ergonomically designed with an integrated thumb rest for safety.

Fully replaceable upper blade.

Contact us

Ernest Doe is a long established family firm with a network of branches in the South and East of England. Managing Director Colin Doe is the fourth generation of the family to have run the business in its 100+ years of trading.

The firm supplies an incredible amount of machinery; from garden mowers and chain saws to combine harvesters and construction excavators. Our philosophy is simple to supply the best products and then to support them with the service facilities and expertise to keep them running perfectly.
