Mountfield SP46 Self Propelled Lawn Mower

A versatile self propelled lawnmower powered by a Mountfield ST120 123cc 4 stroke engine with a robust steel body with a powder coated paint finish for longevity. You can collect clippings into the large 60 litre capacity grass collector, or if the grass is longer remove the collector and rear discharge or simply insert the mulching plug and drive in mulching mode. Mulching enables you to finely cut the grass clippings into a nitrogen-rich mulch which is recycled back into the lawn as a natural fertiliser.

Easily operated by a single lever, the 46cm/18" deck has a choice of 5 cutting height positions ranging from 22 to 65mm and will produce a great finish on your lawn and is ideal for medium sized lawns. The engine is very easy to start, with a standard recoil rope system and the handles can be easily folded for convenient storage
