Description

JFC Agri Green Tipping Wheelbarrow 250L

This innovative wheelbarrow is fitted with a heavy duty galvanised metal frame, tough Polyethylene body and smart tipping mechanism ensuring minimum effort to empty heavy, bulky loads.

The large volume capacity is ideal for efficient cleaning of stalls & stables and surprisingly lightweight even in use. The strong hinge point allows for trouble-free tipping, exactly where you want plus a protective steel plate has been fitted to the lip of body to prevent damage on impact.

Roller bearing pneumatic wheels deliver superior manoeuvrability and handling across fields and uneven terrain, making the JFC the perfect choice for our Equestrian, Farming & Small Holding communities.

Tips for optimum performance include keeping wheels inflated to 30 PSI and ensuring barrow is front heavy to allow for easier unload.

Dimensions: 1830 x 860 x 860mm. Replacement wheels & handle grips can be purchase separately.

**** Minor assembly required for delivered goods by attaching Wheels & Body to Frame. No bolting or screwing; just split pins to hold in place ****

Also available in Berry.
