Stihl GHE 105 Electric Garden Shredder

SH-60070111192

Description

Stihl GHE 105 Electric Garden Shredder

The STIHL electric shredder GHE 105 prepares you for medium-sized shredding jobs throughout the gardening year. The garden shredder is particularly suitable if you mainly want to shred woody tree or hedge cuttings with a high proportion of wood. The cutting unit can efficiently shred branches up to 35 mm in diameter. This electric shredder offers a wide cloverleaf opening for effortless feeding of the clippings into the grinder.

However the STIHL GHE 105 also transforms soft material such as flower cuttings or foliage into a nutrient-rich mixture that can be easily composted. You can add mixed clippings via a separate oblong feed opening. After use, the garden shredder can be easily moved to its storage location thanks to its transport wheels and low weight.

Multi Cut 103 Cutting System – The blade unit on the Multi Cut 103 cutting system transforms the STIHL electric shredder GHE 105 into a versatile machine. It can chip hard branch material and shred soft green clippings as well as plant trimmings to a consistently small size. The multi-bucket tooth disc incorporates reversible chipping blades, wing blades and an aluminium counter-cutter.

Touch Pad Switch – The housing of the STIHL shredder is fitted with a touch pad switch and an operating indicator to allow simple and intuitive operation of the garden shredder.
