Description

Eliet Maestro City Shredder

ELIET emphasises ease of use as a high priority. To limit the effort required during the collecting of the pruning waste, the Maestro has a wide feed-in opening. With this in mind, the Maestro City has the added advantage that the feed-in position is 15 cm lower compared to the Maestro Country.

Robust Frame - All of the ELIET chippers (small and large) are manufactured to the highest degree of craftsmanship. The Maestro City is just one example of this. The steel shredding chamber is firmly welded to the tubular frame. The feed hopper of the ELIET Maestro City has also been manufactured from steel.

Low Noise - In the interests of the environment, ELIET always try to obtain harmony between the machine and its surroundings. The shredding chamber has a double wall in order to reduce the noise pollution from this chipper. The frame wall sound damping material dampens the drumming effect of the chippings on the wall. This action reduces the noise level by several dB.

Collection Bag - The fine chippings that the MAESTRO City spits out form the basis for what will later be nutritional compost. These chippings are immediately collected in a large collection bag so that not one single chipping is lost. The contents of one full collection bag (60 litres) is more than enough to fill one wheelbarrow.

Where you can buy with confidence

Eliet Chopping Principle: Let the wood do the work - ELIET has developed and patented a unique shredder system, the **Chopping Principle™**. Just like a wood axe, the blades hack through the wood by going with the grain. The green waste is converted into small chips in a splitting and cutting cycle. This creates shredding material with quick-composting properties.

Attributes

Technical Data	
Engine	Briggs & Stratton 5.5HP XR 750
Cutting System	12 Eliet Resist Knives (Reversible)
Shreddable diameter	40mm
Collection Capacity	60 Litres
Noise Level	112dB
Weight	63kg
Feed Height	1050mm/41"
Storage dimensions	29 x 26 x 36 Inch

Contact us

Ernest Doe is a long established family firm with a network of branches in the South and East of England. Managing Director Colin Doe is the fourth generation of the family to have run the business in its 100+ years of trading.

The firm supplies an incredible amount of machinery; from garden mowers and chain saws to combine harvesters and construction excavators. Our philosophy is simple to supply the best products and then to support them with the service facilities and expertise to keep them running perfectly.
