Description

Eliet Maestro City Electric Shredder

ELIET emphasises ease of use as a high priority. To limit the effort required during the collecting of the pruning waste, the Maestro has a wide feed-in opening. With this in mind, the Maestro City has the added advantage that the feed-in position is 15 cm lower compared to the Maestro Country.

Robust Frame - Chipping wood is not a menial task. Here, a lot of power is unleashed inside the machine. A chipper only has a long operating life when no compromises are made in terms of quality and durability of the materials used. All of the ELIET chippers (small and large) are manufactured to the highest degree of craftsmanship. The Maestro City is just one example of this. The steel shredding chamber is firmly welded to the tubular frame. The feed hopper of the ELIET Maestro City has also been manufactured from steel.

Low Noise - In the interests of the environment, ELIET always try to obtain harmony between the machine and its surroundings. The shredding chamber has a double wall in order to reduce the noise pollution from this chipper. The frame wall sound damping material dampens the drumming effect of the chippings on the wall. This action reduces the noise level by several dB.

Standard Calibration Sieve - Thanks to its special shredding system, the Eliet Maestro can deal with not only thick branches but also fine pruning waste including that from hedges and shrubs with no problem. Also leafy-rich green waste from flower borders or vegetable gardens can be mixed in together. Even autumn leaves that have been collected up can be put through the shredder.

We are an authorised **Eliet** dealer and can provide full service back up and maintenance for you Eliet machines

Attributes

Technical Data	
Power	230v/3000w
Shreddable Timber Diameter	35mm/1.3"
Blades	12 Eliet Resist knives (Reversible)
Chopping Speed (Cuts per minute)	36.000
Feed Height (mm/inch)	1050mm/41"
Collection Box Capacity	60 Litres
Chassis	Steel
Weight	60kg

Contact us

Ernest Doe is a long established family firm with a network of branches in the South and East of England. Managing Director Colin Doe is the fourth generation of the family to have run the business in its 100+ years of trading.

The firm supplies an incredible amount of machinery; from garden mowers and chain saws to combine harvesters and construction excavators. Our philosophy is simple to supply the best products and then to support them with the service facilities and expertise to keep them running perfectly.
