Description

Defenders Fruit Tree Grease Band 1.75m

Simple and effective grease band to protect fruit and ornamental trees by controlling orchard pests, particularly winter moths, caterpillars, earwigs and ants.

For best results, apply the grease band at the beginning of winter, before adult female moths emerge to climb the trees and lay eggs.

Re-apply in summer to protect against ant infestations and summer crawling pests.

Works by trapping moths before they have a chance to lay eggs, preventing problems later when the caterpillars emerge to feed on leaves.

Other harmful crawling insects will also be controlled, but beneficial insects will not be affected as they are not attracted by the green colour.
