## Description

### Countryside Deer Fencing HT13/190 15x50m

Whether you are looking to keep Deer IN or OUT with protection on a more permanent basis, this 2.5mm gauge Hi-Tensile wire remains the popular choice amongst Deer fencers and provides superior strength when used to secure boundaries, close containment and/or forestry protection. Quick & economical to erect requiring less posts, high tensile fencing can be strained tighter than mild steel and will not stretch hence eliminating the need for regularly re-tightening.

Manufactured to a full height of 190cm and widely used as a one piece Deer net, this 50m Roll has 13 graduated line wires with 150mm between vertical spacing and suitable for both Forestry & Deer Farming applications.
