**Manual fuel pump (Purger)** - A small fuel pump delivers fuel to the carburettor at the touch of a button. This reduces the number of starting strokes required following extended breaks in operations.

**Bike Handle** - When used in conjunction with a harness, the bike handle enables a smooth mowing action. The bike handle allows the machine to be easily guided, making it ideal for working on large areas and thus reducing fatigue.

We are an authorised **Stihl** dealer and can provide full service back up and maintenance for your Stihl equipment.
