Description

Wolf Garten URM3 Multi-Change Scarifier Rake

This premium quality wheeled scarifying rake is specially designed to clear moss and thatch from any lawn with very little effort.

The tool head works on a pendulum action with strong steel blades gliding over the lawn when pushed and biting into the thatch & moss when pulled, for optimum scarification.

With a working width of 30cm, it is ideal for scarifying small to medium sized lawns, allowing oxygen and vital nutrients to penetrate the grass roots more easily for a healthier re-growth.

For a beautiful, moss-free lawn it is recommended you scarify every 6-8 weeks from Spring to Autumn

As part of the unique multi-change system, the tool head can be inter-locked with one of the many length handles in the Wolf Garten range to help prevent back discomfort when working.

To remove or swap it with another tool head from the range, simply press the release button on the upper part of the handle.
