Description

Linseal Oko Tyre Sealant & Instant Repair 1L

Linseal is a new and revolutionary liquid puncture preventative designed for inside a pneumatic tyre or inner tubes and applied BEFORE a puncture occurs.

The sealant is formulated to remains fluid and spreads evenly across the inside of a tyre tread area as the wheel revolves. When a puncture occurs the escaping air pressure forces Linseal into the hole, immediately forming a strong airtight seal.

Linseal acts instantaneously, effectively sealing holes as they occur, with minimal loss of air pressure.

Suitable for all vehicles in construction, demolition, forestry, mining, agriculture as well as allied industries and in particular plant or vehicle susceptible to punctures.

This heavy duty product will seal holes in the tyre tread area caused by objects up to 10mm in diameter, however not intended to seal splits or sidewall punctures.

Technical tests have proven that Linseal has no detrimental effect on the tyre structure and comes complete with an integral filling spout and valve core removing tool.
