

# Private: Bosch Rotak 34 R Electric Rotary Mower

BO-ROTAK34R

Our Price: £124.99

The Rotak 34 R Electric Rotary Mower is a compact, lightweight mower which would be ideal for dealing with a small to medium lawn. It offers all the advantages you would expect from a corded mower: low noise levels, energy efficiency and lightness, as well as eliminating the need to buy or store fuel. The 10m cable is easily long enough to deal with a small or medium lawn without fuss, and this machine is light enough to be used by anyone, whatever their strength or experience of mowing.

## Description

The Rotak 34 R Electric Rotary Mower is a compact, lightweight mower which would be ideal for dealing with a small to medium lawn. It offers all the advantages you would expect from a corded mower: low noise levels, energy efficiency and lightness, as well as eliminating the need to buy or store fuel. The 10m cable is easily long enough to deal with a small or medium lawn without fuss, and this machine is light enough to be used by anyone, whatever their strength or experience of mowing.

The 34cm cutting width is wide enough to be useful in a small or medium garden without making the machine cumbersome or compromising the manoeuvrability, and the hardened and ground steel blade will deal easily with the toughest grass conditions. The inset front wheels and innovative grass combs ensure this machine can cut right up to the grass edge beside patios, flower beds or walls, eliminating the need to retrace your steps to deal with untidy strips of un-mown grass. The cutting height can be adjusted to any of 6 settings between 20-70mm, enabling you to tailor your cut to the needs of your lawn or the look you prefer. The rear roller provides stability when mowing the grass edge, and also gives your lawn that professional striped finish.

The 1300W motor is powerful enough to deal with the toughest grass conditions, and Bosch have incorporated their Powerdrive system to ensure efficiency: the system harnesses the power of the engine and the innovative gear set, senses the load on the blade and adjusts the torque delivery accordingly to ensure that the maximum torque is always sent from the motor, and your mower works with maximum efficiency.

The grass collecting box has a generous capacity of 40l, allowing you to spend as much time mowing, and as little time emptying the grass box, as possible. When you have finished mowing, the rear wheels and integrated carrying handle make this machine easy to transport to its place of storage, and storing your machine is made easy by the double-folding handles and stackable grass box, which together reduce the Rotak 34 R to a compact shape, only 55cm high.
