Private: Stihl MSA 140 Cordless Chainsaw Kit

Description

Stihl MSA 140 Cordless Chainsaw Kit

The perfect tool for pruning branches and cutting firewood, the MSA 140 C-BQ has all the features of the the MSA 120 C-BQ with up to 25% more cutting performance. Powered by a maintenance free EC motor and 36 V Lithium-Ion technology, this compact saw will ease its way through sawing jobs around the garden and property. Weighing in at a low 2.6 kg and perfectly balanced, the chainsaw is comfortable to handle, even for extended periods. The Quick Chain Tensioning system allows for tool-less and hassle-free tightening of the chain. Simple operating controls make this a versatile choice for all users. The saw also features a soft grip handle, a QuickStop Super chain brake and a transparent oil tank with viewing window. The high cutting performance and precise finish is due to a 1/4" PM3 saw chain.

Quiet technology - The STIHL cordless tools are so quiet you don't even need to wear ear protection

Stihl Quick change tensioning - The STIHL Quick Chain Tensioning system (B) makes it very easy to tension the chain. Simply release the sprocket cover and turn the thumb wheel to set the optimum tension. No tools needed.

Stihl electric motor (EC) - The STIHL electric motor (EC) is extremely energy efficient, lightweight and compact. It runs quietly, generates very low vibrations and does not require servicing.

Ematic chain lubrication system - The STIHL Ematic chain lubrication system provides maximum lubrication, longer wear and less oil consumption than conventional methods of chain lubrication. The oil consumption can therefore be reduced by up to 50%.

Quick stop Super Chain brake (Q) - Additional braking system for increased safety, designed by STIHL. The chain does not only stop if kickback is sufficiently strong or during active actuation of the front hand guard, but also when you release the rear handle. Chain over run is stopped within seconds, helping to protect the user.

Neutral battery position - The battery can be inserted into the tool in 2 stages. In the first neutral position, the battery is secured in the tool but does not connect with the contacts, allowing for safe transport. In the second operating position, the battery is completely inserted allowing for full operation of the tool.

Transparent chain oil tank - The transparent tank allows the chain oil level to be easily checked without having to remove the oil filler cap.

Comfortable control handle - The soft black rear control handle ensures a safe and secure grip when in use. The control lever features a interlock system for added safety.

We are an authorised Stihl dealer and are one of the first to stock the new Stihl cordless range. Why not [click here](#) to check our wider range of Stihl products?
