Description

Stihl BR800C-E Backpack Leaf Blower

Excellent power to weight ratio makes the BR 800 easy to operate. Thanks to the ergonomic carrying system (S shaped shoulder strap, chest strap and hip belt) it is comfortable to use throughout the day. The strain reducing blower tube makes it easy to handle too. A handy eyelet is located in the backplate which allows you to hang the blower up for storage. Starting the machine is simple and easy to do thanks to the side start pull cord. The blower can be easily restarted when taking a break from work with a firm pull of the cord. And of course it can also be stopped using the switch on the handle so there's no need to remove the machine if you're taking a quick break or wanting to move from area to area.

The 4-MIX engine of the machine means lower fuel consumption and an increase in run-time meaning more time can be spent working. The length of the blower tube and position of the handle can be adjusted quickly without the need for tools. The blower tube is easy to swivel and has a wide blowing range, lowering the strain felt when working. It also features the STIHL Anti vibration System to reduce the vibration felt on your back.

Stihl 4-Mix Engine – You can always rely on STIHL to keep setting new benchmarks this time with 4-stroke mixed lubrication technology. The STIHL 4-MIX® engine, which runs on a fuel-oil mix just like a 2-stroke, offers the benefits without the compromises of 4-stroke power. STIHL 4-MIX® engine technology provides fast acceleration, more power, added torque, lower noise, reduced emissions and increased fuel efficiency to complete jobs quickly and more easily.

Multi-function control handle – Easy, comfortable thumb-operated control means the operator's hand never leaves the handle
